Eurocodes PLUS

The online tool that makes working with Eurocodes simple

Spend your time designing, not hunting for documents.

How much time do you spend searching through the pages of the Eurocodes?
Do you really want to spend your time laboriously navigating multiple interlinked documents when you would rather be working on the project?

BSI brings you the solution: Eurocodes PLUS

Eurocodes PLUS is a practical, easy-to-use, online tool. It will save you hours of sifting and cross-referencing multiple Eurocodes, and it will revolutionize your working day.

Find the right document faster and easier

- **Find:** smart browse by material, structure, Eurocode and solve problems with advanced keyword search functions
- **Browse:** search within your selected documents, see link maps and timelines
- **Customize:** save selected sections of the documents you need in your own new document
- **Understand:** specially commissioned 'Expert Comments' to key clauses in codes and annexes

Share design knowledge locally, nationally or internationally

Collaborate and revolutionize the way your team works with the Eurocodes – a tool that defies geographical boundaries to achieve your common goals.

Manage projects and workflows more efficiently to easily retain, maintain, and share your design data and records through the knowledge management power of Eurocodes PLUS.

With the user generated notes and comments colleagues can collaborate across the business helping knowledge transfer, embedding best practice and promoting consistency.

“I am convinced that a web-based system, providing easy links between the related clauses and documents, will be a huge benefit to users. The facilities of Eurocodes PLUS are very impressive, allowing individuals and companies to build their own system with references and comments.”

Brian Simpson, Arup

Eight reasons to use Eurocodes PLUS

1. Information at your fingertips, saving you time and money in hours of researching and cross-referencing with an up-to-date integrated database of all parts of the Eurocodes, including National Annexes, Execution Standards and Non-Contradictory Complementary Information (NCCI).
2. Keep your workspace organized and efficient when working amid multiple documents with click-through navigation within, across and between documents.
3. No need to search other files or systems for separate National Annex documents as these decisions are embedded at the clause level.
4. We have embedded expert guidance from industry specialists who have worked on the same types of projects which enables you to ensure success by following best practice.
5. You can easily add notes to documents and share them across the business, wherever and whenever, without the need to use valuable project time in arranging and co-ordinating meetings to gather ideas and feedback.
6. Quickly create custom documents with the information you regularly use, giving you repeat and immediate access to the information that is relevant to your business and your projects.
7. Compare the old with the new – transition from the withdrawn British Standards to Eurocodes is easy as a full set of the withdrawn standards is within the system.
8. Share information outside the system - export all or part of a standard and your custom documents with the download pdf tool.

Designed for engineers by engineers

It has been developed in conjunction with practising engineers, and trialled by 30 major engineering companies across the UK including Network Rail, the Highways Agency, Atkins, Arup and Mott MacDonald amongst others.

“With Eurocodes PLUS, the whole process is simplified... You can also read expert comments and create your own notes, making it easy to capture and share best practice.”

Mike Chrimes, Director, Engineering Policy & Innovation at the Institution of Civil Engineers

About BSI

BSI is the business standards company that helps organizations all over the world make excellence a habit. For more than a century we have been challenging mediocrity and complacency to help embed excellence into the way people and products work. That means showing businesses how to improve performance, reduce risk and achieve sustainable growth. As a global leader in helping organizations improve, our clients range from high profile brands to small, local companies in 150 countries worldwide.
